Strategic Energy Sourcing

Strategic Energy Sourcing

These days buying energy services is not just about reducing cost. Contract strategies must meet corporate risk limits, contribute to the organisation’s sustainability goals, and include optimisation of the physical assets of a company with financial instruments.

Strategic energy sourcing and contract support

Customised procurement strategies

Energy supply contract review

Consolidate multi-site data for tendering

Negotiation with energy retailers for optimal price structure

Identification of wholesale market opportunities

Identification and monetisation of demand response opportunities

Renewable energy and carbon credit A certificate that is equivalent to 1 tonne CO2-e. Credits often refer to instruments issued under a cap and trade scheme, where companies are allocated credits up to their emission cap. If they exceed the cap they need to purchase more credits. More procurement for meeting voluntary corporate targets

Energy efficiency as a service

Bill validation and audit

Validate bills and over-charges

Analyse load profiles

Strategies for cost savings

Reporting and data management

Data management

Data visualisation

Corporate Energy and Carbon Management

Corporate Energy and Carbon Management

Strategic Energy and Greenhouse Gas Advice

Best practice requires your management team to have a good framework for managing energy and carbon, and a roadmap on how to improve.

Energy and Greenhouse Strategy development

Energy supply risks and mitigation strategies

Carbon reduction plans and Carbon offset 1 carbon offset = 1 tonne of CO2-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO2 from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. More strategies

Integrated energy procurement and demand strategy

Carbon accounting

Carbon footprinting of products and services

Sustainability Reporting such as TCFD The Task Force on Climate-related Financial Disclosures (TCFD) is an industry-led effort, chaired by Michael Bloomberg, with 32 global expert members from the private sector. The TCFD recommendations are designed to solicit consistent, decision-useful, forward-looking information on the material financial impacts of climate-related risks and opportunities, including those related to the global transition to a lower-carbon economy., GRI and CDP

Energy Management Systems

When is an EEO Assessment required in Singapore according to Northmore Gordon?

EEO Assessments are required for existing operations and plant expansions in Singapore where a business uses, or projects to use, more than 54TJ per annum.

What EEO-related credentials does Northmore Gordon hold in Singapore?

Northmore Gordon has 3 Singapore Certified EEO Assessors, is a Singapore Accredited ESCO, holds Singapore SCEM status, has 8 Certified M&V Professionals, is ISO 9001 certified, and employs more than 20 industrial energy specialists.

How can a business in Singapore determine whether it is covered by the mandatory energy management scheme?

Northmore Gordon can conduct an initial obligations screen for existing industrial facilities in Singapore, which evaluates business and operational control details, facility boundary and industrial activity conditions, energy-use history over three calendar years to check the 54 TJ threshold in at least two of

those years, energy units and conversion basis, and existing registration and submission status.

What services does Northmore Gordon offer under Strategic Energy Sourcing?

Strategic Energy Sourcing includes customised procurement strategies, energy supply contract review, consolidating multi-site data for tendering, negotiating with energy retailers for optimal pricing, identifying wholesale market opportunities, identifying and monetising demand response opportunities, renewable energy and carbon credit procurement, energy efficiency as a service, bill validation and audit (validating bills/over-charges, analysing load profiles, cost-saving strategies), and reporting and data management (data management, data visualisation, performance against KPIs).

What does Northmore Gordon's Corporate Energy and Carbon Management service include?

This service includes Strategic Energy and Greenhouse Gas Advice (strategy development, energy supply risk mitigation, carbon reduction and carbon offset strategies, integrated energy procurement and demand strategy, carbon accounting, carbon footprinting, and sustainability reporting such as TCFD, GRI and CDP), Energy Management Systems (including an Energy Management Diagnostic tool and ISO50001 certification support), Partnership Programs (multi-year energy management contracts, Virtual Energy Manager, success-fee based models), and Government Grants (policy and grant summaries, grant applications).

What certificate-related services does Northmore Gordon provide?

Northmore Gordon provides certificate creation services including International Renewable Energy Certificates (i-RECs) and Voluntary Carbon Units (VCUs), as well as independent measurement and verification (M&V) services for certificates and due diligence for energy and carbon projects.

What technical services does Northmore Gordon offer?

Technical Services include Audit services (Energy Audit, Energy Blitz, building performance modelling, Certified EEO Assessor services, Qualified Endorser services), Engineering (measurement and monitoring plans, pre-feasibility and detailed feasibility studies, business cases), Project delivery (detailed design, tender specification and management, Owners' Engineer, Project Management, Commissioning), and Reporting (energy data management, Measurement and Verification), plus Corporate Training and Industry Guides such as Energy Management Training and Industry Guides for Government.

How can I contact Northmore Gordon's Singapore office?

Northmore Gordon's Singapore office can be reached at +65 6690 2480, located at 1 Keong Saik Road, Singapore 089109.

How can I contact Northmore Gordon's Australian offices?

Northmore Gordon's Australian contacts are 1300 854 561 (Advisory) and 1300 878 500 (Certificates), with an office at Suite 1, Level 4, 607 Bourke Street, Melbourne, VIC 3000.

Why is Singapore significant to Northmore Gordon's operations according to the knowledge base?

Singapore is identified as one of the clearest operational anchors for Northmore Gordon's service delivery and is a principal operational market alongside Australia, where the company advises businesses on industrial energy management obligations under the Energy Conservation Act.
