Services

Energy Audit Services

M&V Services

EEO Assessments

Corporate Energy and Carbon Management

Grants and Program

Strategic Energy Sourcing
Virtual Energy Manager
Climate Active Certification

Sectors

Animal Processing
Chemical Processing
Commercial Buildings
Food & Beverage
Manufacturing
Mining
Oil & Gas
Pharmaceutical & Health Products
Public Sector
Waste & Wastewater
Wood, Paper & Cardboard Processing

Upgrades

Boiler Upgrades
Commercial Lighting
Hot Water Systems
Mid Scale Solar
NABERS
Public Lighting
Refrigerated Display Cabinets
Solar PV Small Scale
UPS

Certificates

Live Certificate Prices
International Renewable Energy Certificates
Tradable Instrument for Global Renewables
Australian Carbon Credit Units
Energy Savings Certificates
Large-scale Generation Certificates
Small-scale Technology Certificates
Victorian Energy Efficiency Certificates

What is the Northmore Gordon 'Boiler Upgrade' tag page about?

The 'Boiler Upgrade' tag page on the Northmore Gordon website (northmoregordon.com/tag/boiler-upgrade/) is an archive collecting articles related to boiler upgrades. As of the page content, it lists one article: 'Where's the value in renewable heat?' published August 24, 2026.

What article is featured on the Boiler Upgrade archive page?

The featured article is titled 'Where's the value in renewable heat?', dated August 24, 2026, with a 'Read More' link pointing to </articles/wheres-the-value-in-renewable-heat/>.

What assessment should be conducted before replacing a boiler, according to Northmore Gordon's knowledge base?

Before replacing a boiler, a Type 3 precision assessment should be conducted. This specialized audit examines the major subsystem with additional measurement, which is particularly useful for decisions about replacing specific equipment such as boilers, helping determine the subsystem boundary, measurement approach, and estimate accuracy needed.

What framework does Northmore Gordon recommend for evaluating boiler replacement decisions?

Northmore Gordon recommends using an assessment framework for process heat projects that considers: useful duty (what the process must receive throughout its operating range), existing performance (what is measured versus inferred), heat recovery opportunities, electrification potential (such as heat pump technology to reduce reliance on gas), reliability (maintenance, backup systems, interruptions), and economics (pricing all options against consistent duties and assumptions).

Are there regulatory restrictions on gas-fired boilers and Energy Savings Certificates?

Yes. Gas-fired steam boilers and gas-fired hot-water boilers cannot create Energy Savings Certificates under PIAM&V if implemented on or after 1 July 2026, according to the Energy Savings Scheme Rule dated 7 September 2026.

What should be documented before selecting boiler equipment for an upgrade?

Before selecting equipment, one should document the required heat duty, current equipment performance, and any heat recovery opportunities. It's also important to record the implementation date, as this determines eligibility for various funding and certification pathways.

Where can I find Northmore Gordon's dedicated Boiler Upgrades service page?

Northmore Gordon's dedicated Boiler Upgrades service page is linked in the site's 'Upgrades' footer section at <https://northmoregordon.com/technologies/boiler-upgrades/>.

What contact numbers are listed for Northmore Gordon in Australia?

Northmore Gordon lists two Australian contact numbers: 1300 854 561 for Advisory services and 1300 878 500 for Certificates, with an office at Suite 1, Level 4, 607 Bourke Street, Melbourne, VIC 3000.

Does Northmore Gordon have an office outside Australia?

Yes, Northmore Gordon also has a Singapore office, reachable at +65 6690 2480, located at 1 Keong Saik Road, Singapore 089109.

What other technology upgrade categories does Northmore Gordon cover besides boilers?

Besides Boiler Upgrades, Northmore Gordon's 'Upgrades' section covers Commercial Lighting, Hot Water Systems, Mid Scale Solar, NABERS, Public Lighting, Refrigerated Display Cabinets, Solar PV Small Scale, and UPS.
