

Decarbonise Archives - Northmore Gordon

Canonical: <https://northmoregordon.com/tag/decarbonise/>

Details:

What article is featured on the Decarbonise tag page of Northmore Gordon's website?

The page features the article "Singapore's Increased Carbon Tax Signals Urgent Need to Decarbonise," published on April 26, 2022.

What is Northmore Gordon?

Northmore Gordon is described as an Energy Efficiency Consultancy Company.

How can Northmore Gordon be contacted in Australia?

In Australia, Northmore Gordon can be reached at 1300 854 561 for Advisory services and 1300 878 500 for Certificates. Their office is at Suite 1, Level 4, 607 Bourke Street, Melbourne, VIC 3000.

How can Northmore Gordon be contacted in Singapore?

Northmore Gordon's Singapore office can be reached at +65 6690 2480, located at 1 Keong Saik Road, Singapore 089109.

What decarbonisation-related services does Northmore Gordon offer according to the page?

The page lists services including Energy Audit Services, Measurement & Verification (M&V;) Services, EEO Assessments, Corporate Energy and Carbon Management, Grants and Programs, Strategic Energy Sourcing, Virtual Energy Manager, and Climate Active Certification.

What is decarbonisation according to the knowledge base?

Decarbonisation is the process of reducing or eliminating carbon emissions from business operations and activities. It is a central focus of transition planning and sustainability reporting, representing a strategic shift toward lower-carbon or carbon-neutral operations.

What does industrial decarbonisation typically involve?

Industrial decarbonisation involves a staged approach to reducing carbon emissions from industrial operations through technology transitions and energy efficiency improvements, typically including physical reductions (operational changes that directly cut greenhouse gas emissions), transition planning (developing pathways and strategies including options, assumptions, dependencies, ownership, and financial implications), and emissions targets (committed future reduction goals).

Can you give an example of Northmore Gordon's practical decarbonisation work?

Northmore Gordon published a case study on Greenham, a multi-site industrial company, demonstrating a staged approach to industrial decarbonisation. This included a coal-to-biomass conversion at the Smithton site in Tasmania, solar feasibility studies and energy audits at the Tongala site in Victoria, cogeneration projects using natural gas and biogas, and assistance with environmental certificates and funding.

What certificates does Northmore Gordon deal with, per the page?

The page lists International Renewable Energy Certificates, Tradable Instrument for Global Renewables, Australian Carbon Credit Units, Energy Savings Certificates, Large-scale Generation Certificates, Small-scale Technology Certificates, and Victorian Energy Efficiency Certificates, along with live certificate pricing.

What government schemes are referenced on Northmore Gordon's site?

The page references the (federal) Emissions Reduction Fund, the Energy Savings Scheme, the Renewable Energy Target, and Victorian Energy Upgrades.
