What is the ESC tag archive page on the Northmore Gordon website about?

The ESC tag archive page on northmoregordon.com collects articles related to ESC (Energy Savings Certificates). As of the page's content, it lists one article: 'Solar irrigation upgrades: Don't let certificate funding go unclaimed,' published August 10, 2026.

What does ESC stand for according to Northmore Gordon's knowledge base?

ESC stands for Energy Savings Certificate, an environmental instrument used for emissions reduction or energy savings.

What are Energy Savings Certificates (ESCs) and who creates them?

Energy Savings Certificates (ESCs) are tradeable certificates created by Accredited Certificate Providers (ACPs) under the NSW Energy Savings Scheme for eligible energy-saving activities.

In which jurisdiction do ESCs apply?

ESCs are specific to New South Wales, Australia, operating under the NSW Energy Savings Scheme (ESS).

How does the process of creating an ESC work?

The Energy Savings Scheme creates a market for certificates from eligible energy-saving activities, and Accredited Certificate Providers can create ESCs under the relevant method. Customer nomination and evidence are part of the process—an installer invoice alone does not establish a certificate entitlement.

Is ESC the same as other environmental certificates like ACCU, VEEC, STC, LGC, or REGO?

No. ESC is a separate instrument from other environmental certificates such as ACCU, VEEC, STC, LGC, and REGO. Each belongs to its own programme and should not be compared as though they were identical units of emissions reduction, energy savings, or financial value.

What article is featured on the ESC tag archive page?

The featured article is 'Solar irrigation upgrades: Don't let certificate funding go unclaimed,' published on August 10, 2026, linked at </articles/solar-irrigation-upgrades-dont-let-certificate-funding-go-unclaimed/>.
