What is the topic of this tag archive page on the Northmore Gordon website?

The page is the 'Metering & Monitoring' tag archive on Northmore Gordon's website, collecting articles related to metering and monitoring topics.

What articles are listed under the Metering & Monitoring tag on Northmore Gordon's site?

Three articles are listed: 'Industrial metering and data systems should be Technology-Agnostic and Performance-Driven' (February 26, 2026), 'Right Sizing for the Energy Transition – Why Metering & Monitoring Matters!' (August 15, 2025), and 'Better Metering & Monitoring is Growing' (August 15, 2025).

When was the article about industrial metering and data systems published?

The article 'Industrial metering and data systems should be Technology-Agnostic and Performance-Driven' was published on February 26, 2026.

What is Northmore Gordon?

Northmore Gordon is described as an Energy Efficiency Consultancy Company, according to the site's metadata.

What is the purpose of a metering system according to the metering and monitoring knowledge base?

A useful metering system is designed to answer a specific operational or investment question. It begins by specifying the decision that needs to be made, the equipment or site boundary to be measured, and the people who will use the information, with metering scope proportionate to the decision it supports rather than collecting data indiscriminately.

What key design questions should be considered when designing a metering information requirement?

Important design questions include: whether consumption can be attributed to the relevant equipment boundary, whether the recording interval is fine enough to describe significant events, whether the dataset covers representative pre- and post-project conditions, whether context variables like production or occupancy are available, and whether timestamps, units, corrections and source records are retained for reproducibility.

What data responsibilities must be established before installing a metering system?

Before metering installation, responsibilities that must be established include identifying data ownership and access permissions, documenting how data will be exported, specifying how equipment changes will be recorded, addressing time-zone and daylight-saving adjustments, defining data types (interval energy, cumulative register values, or power measurements), and setting procedures for detecting and documenting data issues.

How can someone contact Northmore Gordon's Australian office?

Northmore Gordon can be contacted in Australia via 1300 854 561 (Advisory) or 1300 878 500 (Certificates). Their Melbourne office is located at Suite 1, Level 4, 607 Bourke Street, Melbourne, VIC 3000.

Does Northmore Gordon have a Singapore office, and how can it be contacted?

Yes, Northmore Gordon has a Singapore office reachable at +65 6690 2480, located at 1 Keong Saik Road, Singapore 089109.

What other services does Northmore Gordon offer besides metering and monitoring content?

Northmore Gordon's services include Energy Audit Services, Measurement and Verification (M&V) Services, EEO Assessments, Corporate Energy and Carbon Management, Grants and Programs, Strategic Energy Sourcing, Virtual Energy Manager, and Climate Active Certification.
